SHASTRI OVERSEAS

An ISO 9001 : 2015 certified company
PREMIUM HARDWARE COLLECTION

PREMIUM BRASS SOLUTIONS SINCE 2000

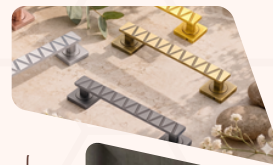

Based in Jamnagar, India—the brass capital of Asia—Shastri Overseas was started with a clear goal: to mix traditional skills with modern technology. Over the last 28 years, our family business has grown from a small local workshop into a trusted global manufacturer and exporter of high-quality hardware.

EXPERIENCE

We are proud of our long history in brass manufacturing. By combining traditional craftsmanship with the latest machinery, we make high-quality products that meet international standards. At Shastri Brass Hardware, excellent quality is at the heart of everything we do.

CUSTOM DESIGNS & INNOVATION

Everything we do is focused on what our customers need. Our team can create fully customized brass products based on your exact drawings and requirements. Whether you need a large order for international shipping or a small, specialized local project, we use our engineering experience to bring your ideas to life.

Artisanal Craft

Design Innovation

In every industry, pioneering new design concepts presents a complex challenge that demands unwavering commitment and professional resilience. Driven by a passion for excellence, we continuously push boundaries to elevate environments, striving to achieve a flawless balance between refined elegance and practical utility. We are dedicated to integrating continuous, strategic, and transformative advancements throughout our operational workflows, product designs, and technological frameworks. Our strategic focus remains on delivering high-impact innovations that yield exceptional aesthetic value and functional performance across all spaces.

Design

Innovation

Our Design Philosophy

Every curated piece in our collection carries a profound sense of purpose, inspired by core values that define our craftsmanship. Beyond mere hardware, we strive to evoke an atmosphere of connection, comfort, and warmth—transforming spaces into places our customers can truly call home. This is the ultimate design philosophy and essence of Shastri Brass Hardware."

From Raw Material to Finish

Our products are the result of careful planning, skilled workmanship, and well-defined processes. Consistency and attention at every stage ensure the quality and finish that set our products apart.

Stage 01 : Scrap Material Quality Check

Description: The production process begins with the careful selection of high-quality brass scrap. At this stage, the purity of the metal is strictly tested to ensure the final product achieves maximum strength and durability.

Stage 02 : Casting Rods from Scrap Material

Description: The selected brass is melted at high temperatures in a furnace and then cast into long cylindrical rods. These rods provide the essential foundation for the subsequent machining process.

Stage 03 : Machining Operation

Description: At this stage, brass rods are cut and carved into precise shapes for tower bolts or hinges using lathe machines & drilling machine. Maintaining design accuracy is critical throughout this process.

Stage 04 : Technical Check

Description: Following the machining process, every part undergoes a meticulous inspection of its dimensions and fitting. This ensures that each product is manufactured exactly according to the established standards.

Stage 05 : Buffing & Polishing

Description: To make the product attractive and shiny, it is polished using wheel buffing. This process removes roughness from the metal surface and gives it a premium finish.

Stage 06 : Mechanism Check

Description: Before final packaging, the movement of the tower bolts and the locking mechanism of the hinges are thoroughly tested. This ensures that every part functions smoothly and operates perfectly for the end user.

Stage 07 : Plating Finishing

Description: After the cleaning process, the tower bolts undergo electroplating to apply different finishes such as Antique Brass, Satin, Chrome, or Black powder coating. This layer not only enhances the visual appeal but also provides long-lasting protection against corrosion and rust.

Stage 08 : Quality Check

Description: This is a comprehensive final inspection where each tower bolt is examined for surface defects, uniform plating, and structural integrity. We ensure that every piece meets the highest quality standards before it moves to the packing department.

Stage 09 : Packing-Polythene Non-Woven Bag

Description: To prevent scratches during transit, individual brass tower bolts are carefully wrapped in high-quality polythene or soft non-woven bags. This ensures that the premium polished or plated finish remains untouched until it reaches the customer.

Stage 10 : Box & Carton Packaging

Description: In the final step, the wrapped products are placed into branded inner boxes along with the necessary screws and accessories. These boxes are then securely packed into heavy-duty corrugated cartons for safe bulk transportation and global shipping.

DESIGN TO INSPIRE
CRAFTED TO PERFECTION

"At Shastri Brass Hardware, we believe that true innovation lies in creating solutions that inspire others toward excellence and leave an enduring mark for generations to come. With each product uniquely designed and meticulously finished, we remain dedicated to preserving our heritage of quality. For years, we have served as a trusted symbol of resilience and superior design, offering an unparalleled level of craftsmanship."

LUXURY BRASS TOWER BOLT

LUXURY RANGE OF TOWER BOLT

ELEVATE EVERY DETAIL
WITH TIMELESS ELEGANCE

"India is recognized globally as a manufacturing powerhouse across a multitude of industries. Centered at the heart of this industrial legacy is Jamnagar, Gujarat—widely celebrated as Asia's premier brass hub. Embracing this rich heritage, every single one of our products is proudly conceptualized, designed, and manufactured in India."
